

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of Claims:

1. (*Currently amended*) A telephone comprising:

a telephone body formed of a molded plastic material, wherein at least part of said body includes a section formed of a transparent material, said section formed of a transparent material having a rear face facing the interior of the telephone;

an adhesive layer provided on the rear face of said section formed of said transparent material;

colored or lustrous fine fragments dispersedly applied onto said adhesive layer so that the fragments are adhesively held on said adhesive layer; and

a painted layer provided on said adhesive layer and said colored or lustrous fine fragments.

2. (*Currently amended*) A telephone comprising:

a body formed of a molded plastic material, wherein at least part of said body includes a section formed of a transparent material; and

a luminous material mixed in said section formed of said transparent material by a predetermined ratio.

3. (*Currently amended*) A telephone comprising:

a body formed of a molded plastic material, wherein at least part of said body includes a section formed of a transparent material, said section formed of a transparent material having a rear face facing the interior of the telephone; and

a painted layer formed on the rear face of said section formed of said transparent material, said painted layer including a luminous material in the form of fine fragments.

4. (*Currently amended*) A telephone comprising:

a body formed of a molded plastic material, wherein at least part of said body includes a section formed of a colored or colorless transparent material; and

fine powders of colored or lustrous materials dispersedly included in said section formed of said transparent material.

5. (*Previously presented*) A telephone comprising:

    a display having a display panel;

    a transparent guard plate disposed over said display panel, wherein said transparent guard plate includes a transparent section having an approximate same size and shape as the display panel in a position corresponding to said display panel and a peripheral section around said transparent section, said peripheral section being formed of a transparent material;

    an adhesive layer provided only on the rear face of said peripheral section; colored or lustrous fine fragments dispersedly applied onto said adhesive layer so that the fragments are adhesively held on said adhesive layer; and

    a painted layer provided on said colored or lustrous fine fragments.

6. (*Previously presented*) A telephone comprising:

    a display having a display panel;

    a transparent guard plate disposed over said display panel, wherein said transparent guard plate includes a transparent section having an approximate same size and shape as the display panel in a position corresponding to said display panel and a peripheral section around said transparent section, said peripheral section being formed of a transparent material and having a rear face facing the interior of the telephone; and

    a painted layer formed only on the rear face of said peripheral section, said painted layer including a luminous material in the form of fine fragments.

7. (*Previously presented*) A telephone comprising:

    a display having a display panel;

    a transparent guard plate disposed over said display panel, wherein said transparent guard plate includes a transparent section having an approximate same size and shape as the display panel in a position corresponding to said display panel and a peripheral section around said transparent section, said peripheral section being formed of a transparent material and having a rear face facing the interior of the telephone; and

    fine powders of colored or lustrous materials dispersedly included in said section formed of said transparent material.

8. (*Currently amended*) A telephone comprising:

    a display having a display panel;

    a transparent guard plate disposed over said display panel, wherein said transparent guard plate includes a transparent section having an approximate same size and shape as the display panel in a position corresponding to said display panel and a peripheral section around said transparent section, said peripheral section being formed of a transparent material and having a rear face facing the interior of the telephone;

    an adhesive layer provided only on the rear face of said peripheral section;

    colored or lustrous fine fragments dispersedly applied onto said adhesive layer so that the fragments are adhesively held on said adhesive layer; and

    a painted layer provided on said colored or lustrous fine fragments,

    wherein said transparent section ~~including a front face and a rear face facing said display panel, said includes a front face being~~ formed as a convex lens having a convex surface, and a rear face facing said display panel, said rear face being formed as a Fresnel lens having a convex lens function.

9. (*Previously Presented*) A telephone as defined in claim 1, wherein said colored or lustrous fine powders are formed of metallic foil.

10. (*Previously Presented*) A telephone as defined in claim 1, wherein said telephone is a portable telephone.

11. *(Previously presented)* A telephone as defined in claim 3, wherein the painted layer includes 5 % to 10 % by weight of the luminous material.
12. *(New)* A telephone as defined in claim 2, wherein the painted layer includes 5 % to 10 % by weight of the luminous material.
